

BETA HR PREMIUM LINE GRILLE

Stainless-steel ventilation grille for HRV systems

Designed for air supply and exhaust in residential and commercial Heat Recovery Ventilation systems. Available in 150 mm and 200 mm sizes.

Premium appearance, practical protection

The patented modern design combines durable stainless-steel construction with an integrated protective wire mesh and drip catcher. These details help guard against insects, debris and condensation while maintaining effective airflow.

MODERN DESIGN FOR SUPPLY OR EXHAUST

3 FINISHES

Stainless steel, black or white.

2 SIZES

150 mm and 200 mm.

HRV READY

Optimised for heat-recovery systems.

Key product features

- Modern patented design.
- Brushed stainless steel, black (RAL 7021) or white (RAL 9010) finishes.
- Available in 150 mm and 200 mm sizes.
- Suitable for air-supply or exhaust applications.
- Optimised for HRV systems.
- Integrated protective wire mesh.
- Drip catcher for added weather protection.
- Durable stainless-steel construction.

Technical performance

Model	Diameter [mm]	Airflow [m³/h]	Pressure [Pa]
BETA HR 150	150	Up to 896	247-282
BETA HR 200	200	Up to 1212	302-305

Applications

- Residential homes and apartments.
- Commercial buildings including offices, schools and shops.
- Heat Recovery Ventilation (HRV) systems.
- Air intake and exhaust applications requiring a modern aesthetic.
