

8" Wide Light Tack Green Tape

Short Description

The 8" Wide Light Tack Green Tape is a versatile and reliable sealing solution designed for construction and HVAC applications. With micro-perforations every 152 mm (6 inches), it allows fast, tool-free application. Its light tack adhesive provides a secure yet removable bond, making it ideal for airtightness testing, duct sealing, and temporary protection.

Technical Specifications

Feature	Specification
Width	203 mm (8 inches)
Length per Roll	50.3 m (165 ft)
Coverage	Approx. 113 registers per roll
Perforation	Every 152 mm (6 inches)
Adhesive Strength	Light tack – secure hold, clean removal
Tensile Strength	High – designed to resist shredding
Colour	High-visibility green

Applications

- Air Sealing for Airtightness Testing – seal penetrations, joints, and fixtures for blower door and air permeability tests.
- Ventilation Duct Sealing – cover duct openings and joints during installation or maintenance to prevent leakage and contamination.
- Duct Cleaning Preparation – temporarily seal duct ends to contain dust and debris.
- Plumbing Pipe Sealing – provide temporary seals on open plumbing ducts and smell pipes to block odours, dust, and debris.
- Construction Site Protection – seal doors, windows, vents, or use as disposable boot/shoe covers.

Key Benefits

- Quick, tool-free application with perforated design.
- Secure hold with clean removal.
- Durable tape with high tensile strength to prevent shredding.
- High-visibility green colour for easy identification.
- Economical roll length suited for large-scale projects.
