

## BETA HR Premium Line Ventilation Grill

### Short Description

The BETA HR is a premium stainless steel ventilation grill designed for air supply and exhaust in HRV systems. Available in 150 mm and 200 mm sizes, it comes in brushed stainless steel, black (RAL7021), and white (RAL9010) finishes.

### Full Product Description

The BETA HR ventilation grill from the Premium Line combines modern design with high durability and performance. It is suitable for both air intake and exhaust, making it ideal for HRV (Heat Recovery Ventilation) systems in residential and commercial projects. Manufactured from stainless steel, it offers a patented modern look with practical features such as an integrated wire mesh and drip catcher. These ensure protection against insects, debris, and condensation, while maintaining optimal airflow.

## Key Features

- Modern patented design
- Available in stainless steel, black (RAL7021), or white (RAL9010)- Sizes: 150 mm and 200 mm
- For air supply or exhaust applications
- Optimised for HRV systems
- Equipped with protective wire mesh
- Drip catcher for added weather protection
- Durable stainless steel construction

## Technical Performance

Model	Diameter (mm)	Airflow (m <sup>3</sup> /h)	Pressure (Pa)
BETA HR 150	150	Up to 896	247–282
BETA HR 200	200	Up to 1212	302–305

## Applications

- Residential homes and apartments
- Commercial buildings such as offices, schools, and shops
- Heat Recovery Ventilation (HRV) systems
- Air intake and exhaust applications requiring a modern aesthetic
